EDUCATION

THE OHIO STATE UNIVERSITY B.S. Economics, awarded the Wallace & Lynn Volwiler scholarship

WORK HISTORY

Freelance Developer, Student August 2018 - Present

Developing music composition application using Max MSP and JavaScript, to be distributed independently. Familiarizing myself with the React framework via independent study and tutoring.

Front End Developer at InvestCloud, Inc. October 2016 - July 2018

Responsible for delivering the front end view and functionality to clients. Worked with business analyst to determine project scope and meet client requests. Worked with back end developers to troubleshoot data issues. Assisted in code reviews, bug resolution, and training. Primarily worked with JavaScript for implementing functionality, and Xamarin for mobile applications.

Medical Office Assistant at Generations Family Medicine July 2014 - June 2016

Compiled laboratory data for physician review, communicate physician's recommendations to patient, and coordinated insurance authorization protocols for physician referral.

Jr. Financial Analyst at Digital First Media August 2013 - April 2014

Created a weekly revenue forecast based on yearly trends with the help of department VP's. Presented this data to the President. Contributed to yearly budget forecasts.

Personal Projects

Video Search

Implemented a video search using ReactJS based on Stephen Grider's React/Redux course. Application pulls data from YouTube API and renders a clickable list of search results.

Weather Search

Implemented a responsive weather search using AngularJS. Users enter their location to pull data from Yahoo's Weather API.

Registration Form Validator

Developed a form validator that checks for a username, matching passwords, and e-mail formatting, written in plain JavaScript.

SKILLS

Development - JavaScript, React/Redux, HTML5, CSS3, Github. Some Java, Xcode, AngularJS experience.

Visual Design - Adobe Photoshop, Illustrator
