WORK HISTORY

Front End Developer at InvestCloud, Inc. October 2016 - July 2018
Built front end screens (mobile and desktop) for product integration. Worked with business analyst to meet client requests. Worked with back end developers to troubleshoot data issues.

Medical Office Assistant at Generations Family Medicine July 2014 - June 2016
Compiled laboratory data for physician review, communicate physician's recommendations to patient, and coordinated insurance authorization protocols for physician referral.

Jr. Financial Analyst at Digital First Media August 2013 - April 2014
Created a weekly revenue forecast based on yearly trends with the help of department VP's. Presented this data to the President. Contributed to yearly budget forecasts.

Intern at Resource/Ammirati June 2012 - September 2012
Performed bank reconciliations, updated GL and balance sheet, and developed spreadsheets related to company finances. Worked closely with management of various departments to create case studies.

Personal Projects

Weather Search
Implemented a responsive weather search using AngularJS. Users enter their location to pull data from Yahoo's Weather API.

Video Search
Implemented a video search using ReactJS. Application pulls data from YouTube API and renders a clickable list of search results.

Registration Form Validator
Developed a form validator that checks for a username, matching passwords, and e-mail formatting, written in plain JavaScript.

Calculator App
Developed a pure JavaScript calculator which allows for exponents, radicals, parentheses, all while preserving order of operations.

SKILLS

Development - JavaScript, React/Redux, HTML5, CSS3, Git/Github, some Java and Angular experience
Visual Design - Adobe Photoshop, Illustrator
